ABOUT ME

Software engineer with experience building generative AI solutions in production: RAG systems, autonomous agents, chatbots powered by large language models (LLMs), and intelligent process automation. I have taken prototypes to production in real-world environments, integrating models from OpenAI and Anthropic, as well as Pinecone/embeddings pipelines. I am self-motivated, curious, and focused on driving direct impact on the product.

LABOR EXPERIENCE

AI Engineer / Mobile Developer

CODX Digital | May 2025 - Present

- Development of the Kunoa AI system (health app): RAG architecture with Pinecone, generation of personalized nutrition plans with OpenAI and Anthropic, Python backend on AWS Lambda
- Implementation of embedding and retrieval pipelines for contextual queries on medical knowledge bases
- Integration of AI agents for the automation of clinical workflows using natural language processing
- Development of Leonard AI (SaaS for aesthetic centers): 42 Supabase tables, 51 RPCs, management system with integrated AI

Full Stack Developer

Goviideo | February 2024 - March 2025

- Development of AI solutions for process automation and optimization, implementing machine learning models
- Creation of script-generation applications using on-premises LLM models
- Creation of chatbots using the OpenAI API, enhancing the user experience
- Workflow automation using tools such as Make and n8n

Full Stack Developer

Inetum | June 2022 - November 2023

- Optimizing database query performance, significantly reducing data load times, and improving application responsiveness.
- Database design and management, implementation of efficient schemas, and maintenance of data integrity.

SKILLS

- IA/ML: OpenAI API, Anthropic Claude, LangChain, RAG (Pinecone), Embeddings, Prompt Engineering, Agentes autonomos
- Backend: Python, Node.js, TypeScript, AWS Lambda, Supabase
- Mobile: Swift, Kotlin, SwiftUI, Jetpack Compose
- Infra: Docker, AWS, Hetzner, CI/CD
- Otros: Git, n8n, Make

EDUCATION

Uni Eibar-Ermua

Specialization in Cybersecurity | September 2021 - March 2022

FP Zornotza

Higher Degree in Application Development | September 2019 - June 2021
